Glossary

The terms in this glossary are defined as used in the Nevada County General Plan.

Any words not defined in this Glossary shall be construed in their generally accepted meaning as defined in the most recent publication of Webster’s New International Dictionary.

Abbreviations

- **ADT**: Average daily trips made by vehicles or persons in a 24-hour period
- **ALUC**: Airport Land Use Commission
- **BMR**: Below-market-rate dwelling unit
- **CBD**: Central Business District
- **CC&Rs**: Covenants, Conditions, and Restrictions
- **CDBG**: Community Development Block Grant
- **CEQA**: California Environmental Quality Act
- **CFD**: A Mello-Roos Community Facilities District
- **CHFA**: California Housing Finance Agency
- **CIP**: Capital Improvements Program
- **CMP**: Congestion Management Plan
- **CNEL**: Community Noise Equivalent Level
- **COG**: Council of Governments
- **CRA**: Community Redevelopment Agency
- **EIR**: Environmental Impact Report (State)
- **EIS**: Environmental Impact Statement (Federal)
- **FAR**: Floor Area Ratio
- **FAUS**: Federal Aid to Urban Systems
- **FEMA**: Federal Emergency Management Agency
- **FHWA**: Federal Highway Administration
- **FIR**: Fiscal Impact Report
- **FIRM**: Flood Insurance Rate Map
- **FmHA**: Farmers Home Administration
- **GMI**: Gross Monthly Income
- **HAP**: Housing Assistance Plan
- **HCD**: Housing and Community Development Department of the State of California.
- **HOV**: High Occupancy Vehicle
- **HUD**: U.S. Dept. of Housing and Urban Development
- **JPA**: Joint Powers Authority
- **LAFCo**: Local Agency Formation Commission
- **LHA**: Local Housing Authority
- **LOS**: Level of Service
- **LRT**: Light-duty Rail Transit
- **NEPA**: National Environmental Policy Act
- **OPR**: Office of Planning and Research, State of California
- **PUD**: Planned Unit Development
- **UBC**: Uniform Building Code
- **UHC**: Uniform Housing Code
- **UMTA**: Urban Mass Transportation Administration
- **SRO**: Single Room Occupancy
- **TDM**: Transportation Demand Management
- **TDR**: Transfer of Development Rights
- **TSM**: Transportation Systems Management
- **VMT**: Vehicle Miles Traveled
Acceptable Risk
A hazard which is deemed to be a tolerable exposure to danger given the expected benefits to be obtained. Different levels of acceptable risk may be assigned according to the potential danger and the criticalness of the threatened structure. The levels may range from “near zero” for nuclear plants and natural gas transmission lines to “moderate” for open space, ranches and low-intensity warehouse uses.

Access/Egress
The ability to enter a site from a roadway and exit a site onto a roadway by motorized vehicle.

Acres, Gross
The entire acreage of a site. Most communities calculate gross acreage to the centerline of proposed bounding streets and to the edge of the right-of-way of existing or dedicated streets.

Acres, Net
The portion of a site that can actually be built upon. The following generally are not included in the net acreage of a site: public or private road rights-of-way, public open space, and flood ways.

Active Solar System
A system that uses a mechanical device, such as pumps or fans run by electricity in addition to solar energy, to transport air or water between a solar collector and the interior of a building for heating or cooling. (See “Passive Solar System.”)

Adaptive Reuse
The conversion of obsolescent or historic buildings from their original or most recent use to a new use. For example, the conversion of former hospital or school buildings to residential use, or the conversion of an historic single-family home to office use.

Adverse Impact
A negative consequence for the physical, social, or economic environment resulting from an action or project.

Affordability Requirements
Provisions established by a public agency to require that a specific percentage of housing units in a project or development remain affordable to very low- and low-income households for a specified period.

Affordable Housing
Housing capable of being purchased or rented by a household with very low, low, or moderate income, based on a household’s ability to make monthly payments necessary to obtain housing. Housing is considered affordable when a household pays less than 30 percent of its gross monthly income (GMI) for housing including utilities.

Agency
The governmental entity, department, office, or administrative unit responsible for carrying out regulations.

Aggregates
Aggregates are classified into two major categories: (1) crushed stone; and (2) sand and gravel. Crushed stone is regulated under Surface Mining policies. Sand and gravel, produced from modern or ancient stream beds or flood plains, are covered under specific Surface Mining policies. Commercial aggregates may also be produced from waste from Surface or Subsurface mines; in such cases the appropriate policies apply.

Agricultural Preserve
Land designated for agriculture or conservation. (See “Williamson Act.”)

Agriculture
Use of land for the production of food and fiber, including the growing of crops and/or the grazing of animals on natural prime or improved pasture land.

Agriculture-related Business
Feed mills, dairy supplies, poultry processing, creameries, auction yards, veterinarians and other businesses supporting local agriculture.

Air Pollution
Concentrations of substances found in the atmosphere which exceed naturally occurring quantities and are undesirable or harmful in some way.

Airport-related Use
A use which supports airport operations including, but not limited to, aircraft repair and maintenance, flight instruction, and aircraft chartering.

Air Rights
The right granted by a property owner to a buyer to use space above an existing right-of-way or other site, usually for development.

Alley
A narrow service way, either public or private, which provides a permanently reserved but secondary means of public access not intended for general traffic circulation. Alleys typically are located along rear property lines.

Alluvial
Soils deposited by stream action.
Ambient
Surrounding on all sides; used to describe measurements of existing conditions with respect to traffic, noise, air and other environments.

Annex,
To incorporate a land area into an existing district or municipality, with a resulting change in the boundaries of the annexing jurisdiction.

Apartment
(1) One or more rooms of a building used as a place to live, in a building containing at least one other unit used for the same purpose. (2) A separate suite, not owner occupied, which includes kitchen facilities and is designed for and rented as the home, residence, or sleeping place of one or more persons living as a single housekeeping unit.

Approach Zone
The air space at each end of a landing strip that defines the glide path or approach path of an aircraft and which should be free from obstruction.

Appropriate
An act, condition, or state which is considered suitable.

Aquifer
An underground, water-bearing layer of earth, porous rock, sand, or gravel, through which water can seep or be held in natural storage. Aquifers generally hold sufficient water to be used as a water supply.

Arable
Land capable of being cultivated for farming.

Archaeological
Relating to the material remains of past human life, culture, or activities.

Architectural Control; Architectural Review
Regulations and procedures requiring the exterior design of structures to be suitable, harmonious, and in keeping with the general appearance, historic character, and/or style of surrounding areas. A process used to exercise control over the design of buildings and their settings. (See “Design Review.”)

Area; Area Median Income
As used in State of California housing law with respect to income eligibility limits established by the U.S. Department of Housing and Urban Development (HUD), “area” means metropolitan area or nonmetropolitan county. In non-metropolitan areas, the “area median income” is the higher of the county median family income or the statewide non-metropolitan median family income.

Arterial
Medium-speed (30-40 mph), medium-capacity (10,000-35,000 average daily trips) roadway which provides intra-community travel and access to the county-wide highway system. Access to community arterials should be provided at collector roads and local streets, but direct access from parcels to existing arterials is common.

Artesian
An aquifer in which water is confined under pressure between layers of impermeable material. Wells tapping into an artesian stratum will flow naturally without the use of pumps. (See “Aquifer.”)

Assessment District
(See “Benefit Assessment District.”)

Assisted Housing
Generally multi-family rental housing, but sometimes single-family ownership units, whose construction, financing, sales prices, or rents have been subsidized by federal, state, or local housing programs including, but not limited to Federal Section 8 (new construction, substantial rehabilitation, and loan management set-asides), Federal Sections 213, 236, and 202, Federal Section 221(d)(3) (below-market interest rate program), Federal Section 101 (rent supplement assistance), CDBG, FmHA Section 515, multi-family mortgage revenue bond programs, local redevelopment and in lieu fee programs, and units developed pursuant to local inclusionary housing and density bonus programs. By January 1, 1992, all California Housing Elements are required to address the preservation or replacement of assisted housing that is eligible to change to market rate housing by 2002.
**Glossary**

**Base Flood**
In any given year, a 100-year flood that has 1% likelihood of occurring, and is recognized as a standard for acceptable risk.

**Bed and Breakfast**
Usually a dwelling unit, but sometimes a small hotel, which provides lodging and breakfast for temporary overnight occupants, for compensation.

**Below-market-rate (BMR) Housing Unit**
(1) Any housing unit specifically priced to be sold or rented to low- or moderate-income households for an amount less than the fair-market value of the unit. Both the State of California and the U.S. Department of Housing and Urban Development set standards for determining which households qualify as “low income” or “moderate income.” (2) The financing of housing at less than prevailing interest rates.

**Bikeways**
A term that encompasses bicycle lanes, bicycle paths, and bicycle routes.

**Biomass**
Plant material, used for the production of such things as fuel alcohol and non-chemical fertilizers. Biomass sources may be plants grown especially for that purpose or waste products from livestock, harvesting, milling, or from agricultural production or processing.

**Biotic Community**
A group of living organisms characterized by a distinctive combination of both animal and plant species in a particular habitat.

**Bond**
An interest-bearing promise to pay a stipulated sum of money, with the principal amount due on a specific date. Funds raised through the sale of bonds can be used for various public purposes.

**Buffer Zone**
An area of land separating two distinct land uses that acts to soften or mitigate the effects of one land use on the other.

**Building**
Any structure used or intended for supporting or sheltering any use or occupancy.

**Buildout; Build-out**
Development of land to its full potential or theoretical capacity as permitted under current or proposed planning or zoning designations. (See "Carrying Capacity (3)."

**Business Services**
A subcategory of commercial land use which permits establishments primarily engaged in rendering services to other business establishments on a fee or contract basis, such as advertising and mailing; building maintenance; personnel and employment services; management and consulting services; protective services; equipment rental and leasing; photo finishing; copying and printing; travel; office supply; and similar services.
California Environmental Quality Act (CEQA)
A State law requiring State and local agencies to regulate activities with consideration for environmental protection. If a proposed activity has the potential for a significant adverse environmental impact, an Environmental Impact Report (EIR) must be prepared and certified as to its adequacy before taking action on the proposed project. General Plans require the preparation of a “program EIR.”

California Housing Finance Agency (CHFA)
A State agency, established by the Housing and Home Finance Act of 1975, which is authorized to sell revenue bonds and generate funds for the development, rehabilitation, and conservation of low-and moderate-income housing.

Caltrans
California Department of Transportation.

Capital Improvements Program (CIP)
A program, administered by a city or county government and reviewed by its planning commission, which schedules permanent improvements, usually for a minimum of five years in the future, to fit the projected fiscal capability of the local jurisdiction. The program generally is reviewed annually, for conformance to and consistency with the general plan.

Carbon Dioxide
A colorless, odorless, non-poison gas that is a normal part of the atmosphere.

Carbon Monoxide
A colorless, odorless, highly poisonous gas produced by automobiles and other machines with internal combustion engines that imperfectly burn fossil fuels such as oil and gas.

Carrying Capacity
Used in determining the potential of an area to absorb development: (1) the level of land use, human activity, or development for a specific area that can be accommodated permanently without an irreversible change in the quality of air, water, land, or plant and animal habitats. (2) The upper limits of development beyond which the quality of human life, health, welfare, safety, or community character within an area will be impaired. (3) The maximum level of development allowable under current zoning. (See "Buildout.")

Census
The official decennial enumeration of the population conducted by the federal government.

Central Business District (CBD)
The major commercial downtown center of a community. General guidelines for delineating a downtown area are defined by the U.S. Census of Retail Trade, with specific boundaries being set by the local municipality.

CEQA
California Environmental Quality Act

Channelization
(1) The straightening and/or deepening of a watercourse for purposes of storm-runoff control or ease of navigation. Channelization often includes lining of stream banks with a retaining material such as concrete. (2) At the intersection of roadways, the directional separation of traffic lanes through the use of curbs or raised islands which limit the paths that vehicles may take through the intersection.

Character
Special physical characteristics of a structure or area that set it apart from its surroundings and contribute to its individuality.

Circulation Element
One of the seven State-mandated elements of a local general plan, it contains adopted goals, policies and implementation programs for the planning and management of existing and proposed thoroughfares, transportation routes, and terminals, as well as local public utilities and facilities, all correlated with the land use element of the general plan.

City
City, with a capital “C,” generally refers to the government or administration of a city. City, with a lower case “c” may mean any city, or may refer to the geographical area of a city (e.g., the city's bikeway system.)

Clear Zone
That section of an approach zone of an airport where the plane defining the glide path is 50 feet or less above the center-line of the runway. The clear zone ends where the height of the glide path above ground level is above 50 feet. Land use under the clear zone is restricted.

Clustered Development
Development in which a number of dwelling units are placed in closer proximity than usual, or are attached, with the purpose of retaining an open space area.

Collector
Relatively-low-speed (25-30 mph), relatively-low-volume (5,000-20,000 average daily trips) street which provides circulation within and between neighborhoods. Collectors
usually serve short trips and are intended for collecting trips from local streets and distributing them to the arterial network.

**Commercial**
A land use classification which permits facilities for the buying and selling of commodities and services.

**Commercial Strip**
Commercial development, usually one store deep, that fronts on a major street for a distance of one city block or more. Includes individual buildings on their own lots, with or without on-site parking, and small linear shopping centers with shallow on-site parking in front of the stores.

**Community Care Facility**
Elderly housing licensed by the State Health and Welfare Agency, Department of Social Services, typically for residents who are frail and need supervision. Services normally include three meals daily, housekeeping, security and emergency response, a full activities program, supervision in the dispensing of medicine, personal services such as assistance in grooming and bathing, but no nursing care. Sometimes referred to as residential care or personal care. (See “Congregate Care.”)

**Community Development Block Grant (CDBG)**
A grant program administered by the U.S. Department of Housing and Urban Development (HUD) on a formula basis for entitlement communities, and by the State Department of Housing and Community Development (HCD) for non-entitled jurisdictions. This grant allots money to cities and counties for housing rehabilitation and community development, including public facilities and economic development.

**Community Facilities District**
Under the Mello-Roos Community Facilities Act of 1982 (Government Code Section 53311 et seq), a legislative body may create within its jurisdiction a special district that can issue tax-exempt bonds for the planning, design, acquisition, construction, and/or operation of public facilities, as well as provide public services to district residents. Special tax assessments levied by the district are used to repay the bonds.

**Community Noise Equivalent Level (CNEL)**
A 24-hour energy equivalent level derived from a variety of single-noise events, with weighting factors of 5 and 10 dBA applied to the evening (7:00 to 10:00 pm) and nighttime (10:00 pm to 7:00 am) periods, respectively, to allow for the greater sensitivity to noise during these hours.

**Community Park**
Land with full public access intended to provide recreation opportunities beyond those supplied by neighborhood parks. Community parks are larger in scale than neighborhood parks but smaller than regional parks.

**Community Service Area**
A geographic subarea of a city or county used for the planning and delivery of parks, recreation, and other human services based on an assessment of the service needs of the population in that subarea.

**Commute-shed**
The area from which people do or might commute from their homes to a specific workplace destination, given specific assumptions about maximum travel time or distance.

**Comparison Goods**
Retail goods for which consumers will do comparison shopping before making a purchase. These goods tend to have a style factor and to be “larger ticket” items such as clothes, furniture, appliances and automobiles.

**Compatible**
Capable of existing together without conflict or ill effects.

**Compatible General Plan Designations**
As used in the Mineral Management Chapter of the General Plan, those Nevada County General Plan designations potentially compatible for surface mining, including the following:
- Rural
- Forest
- Industrial
- Public
- Water
- Planned Development

**Compatible Land Use**
As used in the Mineral Management Chapter of the General Plan, land uses inherently compatible with surface mining or surface access to subsurface mining. Generally, this is land with a minimum of public or private investment in structures and land improvements, and which may allow mining because of the relative economic value of recovered minerals in comparison to the value of the land and its improvements. Examples of such uses may include, but shall not be limited to, rural residential, industrial, recreational, agricultural, silvicultural, grazing, and open space.
Congestion Management Plan (CMP)
A mechanism employing growth management techniques, including traffic level of service requirements, development mitigation programs, transportation systems management, and capital improvement programming, for the purpose of controlling and/or reducing the cumulative regional traffic impacts of development. AB 1791, effective August 1, 1990, requires all cities, and counties that include urbanized areas, to adopt and annually update a Congestion Management Plan.

Congregate Care
Apartment housing, usually for seniors, in a group setting that includes independent living and sleeping accommodations in conjunction with shared dining and recreational facilities. (See “Community Care Facility.”)

Conservation
The management of natural resources to prevent waste, destruction, or neglect. The state mandates that a Conservation Element be included in the general plan.

Conservation Element
One of the seven State-mandated elements of a local general plan, it contains adopted goals, policies and implementation programs for the conservation, development, and use of natural resources including water and its hydraulic force, forests, soils, rivers and other waters, harbors, fisheries, wildlife, minerals, and other natural resources.

Consistent
Free from variation or contradiction. Programs in the General Plan are to be consistent, not contradictory or preferential. State law requires consistency between a general plan and implementation measures such as the zoning ordinance.

Convenience Goods
Retail items generally necessary or desirable for everyday living, usually purchased at a convenient nearby location. Because these goods cost relatively little compared to income, they are often purchased without comparison shopping.

Cottage Industry
A commercial activity which is conducted in conjunction with a residential use, and which has characteristics compatible with the residential character of the area.

County
County, with a capital “C,” generally refers to the government or administration of a county. County, with a lower case “c” may mean any county, or may refer to the geographical area of a county (e.g., the county’s road system.)

Covenants, Conditions, and Restrictions (CC&Rs)
A term used to describe restrictive limitations which may be placed on property and its use, and which usually are made a condition of holding title or lease.

Criterion
A standard upon which a judgment or decision may be based. (See “Standards.”)

Cul-de-sac
A short street or alley with only a single means of ingress and egress at one end and with a large turnaround at its other end.

Cumulative Impact
As used in CEQA, the total impact resulting from the accumulated impacts of individual projects or programs over time.
**GLOSSARY**

**dB**
Decibel; a unit used to express the relative intensity of a sound as it is heard by the human ear.

**dBA**
The “A-weighted” scale for measuring sound in decibels; weighs or reduces the effects of low and high frequencies in order to simulate human hearing. Every increase of 10 dBA doubles the perceived loudness though the noise is actually ten times more intense.

**Dedication**
The turning over by an owner or developer of private land for public use, and the acceptance of land for such use by the governmental agency having jurisdiction over the public function for which it will be used. Dedications for roads, parks, school sites, or other public uses often are made conditions for approval of a development by a city or county.

**Dedication, In lieu of**
Cash payments which may be required of an owner or developer as a substitute for a dedication of land, usually calculated in dollars per lot, and referred to as in lieu fees or in lieu contributions.

**Defensible space**
(1) In fire-fighting and prevention, a 30-foot area of noncombustible surfaces separating urban and wildland areas. (2) In urban areas, open spaces, entry points, and pathways configured to provide maximum opportunities to rightful users and/or residents to defend themselves against intruders and criminal activity.

**Density, Residential**
The number of permanent residential dwelling units per acre of land. Densities specified in the General Plan may be expressed in units per gross acre or per net developable acre. (See “Acres, Gross,” and “Developable Acres, Net.”)

**Density Bonus**
The allocation of development rights that allow a parcel to accommodate additional square footage or additional residential units beyond the maximum for which the parcel is zoned, usually in exchange for the provision or preservation of an amenity at the same site or at another location. Under California law, a housing development that provides 20% of its units for lower income households, or 10% of its units for very low-income households, or 50% of its units for seniors, is entitled to a density bonus. (See “Development Rights, Transfer of.”)

**Density, Control of**
A limitation on the occupancy of land. Density can be controlled through zoning in the following ways: use restrictions, minimum lot-size requirements, floor area ratios, land use-intensity ratios, setback and yard requirements, minimum house-size requirements, ratios comparing number and types of housing units to land area, limits on units per acre, and other means. Allowable density often serves as the major distinction between residential districts.

**Density Transfer**
A way of retaining open space by concentrating densities—usually in compact areas adjacent to existing urbanization and utilities—while leaving unchanged historic, sensitive, or hazardous areas. In some jurisdictions, for example, developers can buy development rights of properties targeted for public open space and transfer the additional density to the base number of units permitted in the zone in which they propose to develop.

**Design Review; Design Control**
The comprehensive evaluation of a development and its impact on neighboring properties and the community as a whole, from the standpoint of site and landscape design, architecture, materials, colors, lighting, and signs, in accordance with a set of adopted criteria and standards.

“Design Control” requires that certain specific things be done and that other things not be done. Design Control language is most often found within a zoning ordinance. “Design Review” usually refers to a system set up outside of the zoning ordinance, whereby projects are reviewed against certain standards and criteria by a specially established design review board or committee. (See “Architectural Control.”)

**Destination Retail**
Retail businesses that generate a special purpose trip and which do not necessarily benefit from a high-volume pedestrian location.

**Detention Dam/Basin/Pond**
Dams may be classified according to the broad function they serve, such as storage, diversion, or detention. Detention dams are constructed to retard flood runoff and minimize the effect of sudden floods. Detention dams fall into two main types. In one type, the water is temporarily stored, and released through an outlet structure at a rate that will not exceed the carrying capacity of the channel.
downstream. Often, the basins are planted with grass and used for open space or recreation in periods of dry weather. The other type, most often called a Retention Pond, allow for water to be held as long as possible and may or may not allow for the controlled release of water. In some cases, the water is allowed to seep into the permeable banks or gravel strata in the foundation. This latter type is sometimes called a Water-Spreading Dam or Dike because its main purpose is to recharge the underground water supply. Detention dams are also constructed to trap sediment. These are often called Debris Dams.

Developable Land
Land that is suitable as a location for structures and that can be developed free of hazards to, and without disruption of, or significant impact on, natural resource areas.

Developer
An individual who or business that prepares raw land for the construction of buildings or causes to be built physical building space for use primarily by others, and in which the preparation of the land or the creation of the building space is in itself a business and is not incidental to another business or activity.

Development
(a) Generally, the physical extension and/or construction of urban land uses. Development activities include: subdivision of land; construction or alteration of structures, roads, utilities, and other facilities; installation of septic systems; grading; deposit of refuse, debris, or fill materials; and clearing of natural vegetative cover (with the exception of agricultural activities). Routine repair and maintenance activities are exempted.
(b) As used in the Mineral Management Chapter of the General Plan: (1) The preparation of a mining property or area so that an ore body can be opened for analysis. (2) The preparation or opening up of an ore body to estimate its tonnage and quality. Development is an intermediate stage between exploration and mining.

Development Fee
(See “Impact Fee.”)

Development Rights
The right to develop land by a land owner who maintains fee-simple ownership over the land or by a party other than the owner who has obtained the rights to develop. Such rights usually are expressed in terms of density allowed under existing zoning. For example, one development right may equal one unit of housing or may equal a specific number of square feet of gross floor area in one or more specified zone districts. (See “Interest, Fee” and “Interest, Less-than-fee,” and “Development Rights, Transfer of [TDR].”)

Development Rights, Transfer of (TDR)
Also known as “Transfer of Development Credits,” a program which can relocate potential development from areas where proposed land use or environmental impacts are considered undesirable (the “donor” site) to another (“receiver”) site chosen on the basis of its ability to accommodate additional units of development beyond that for which it was zoned, with minimal environmental, social, and aesthetic impacts. (See “Development Rights.”)

Discourage,
To advise or persuade to refrain from.

Discretionary Decision
As used in CEQA, an action taken by a governmental agency which calls for the exercise of judgment in deciding whether to approve and/or how to carry out a project.

Distribution Use
(See “Warehousing Use.”)

District
(1) An area of a city or county that has a unique character identifiable as different from surrounding areas because of distinctive architecture, streets, geographic features, culture, landmarks, activities, or land uses. (2) A portion of the territory of a city or county within which uniform zoning regulations and requirements apply; a zone.

Diversion
The direction of water in a stream away from its natural course (i.e., as in a diversion that removes water from a stream for human use).

Diversity
Differences among otherwise similar elements that give them unique forms and qualities. E.g., housing diversity can be achieved by differences in unit size, tenure, or cost.

Dwelling Unit
A room or group of rooms (including sleeping, eating, cooking, and sanitation facilities, but not more than one kitchen), which constitutes an independent housekeeping unit, occupied or intended for occupancy by one household on a long-term basis.
Glossary

**Easement**
Usually the right to use property owned by another for specific purposes or to gain access to another property. For example, utility companies often have easements on the private property of individuals to be able to install and maintain utility facilities.

**Easement, Conservation**
A tool for acquiring open space with less than full-fee purchase, whereby a public agency buys only certain specific rights from the land owner. These may be positive rights (providing the public with the opportunity to hunt, fish, hike, or ride over the land) or they may be restrictive rights (limiting the uses to which the land owner may devote the land in the future.)

**Easement, Scenic**
A tool that allows a public agency to use an owner’s land for scenic enhancement, such as roadside landscaping or vista preservation.

**Ecology**
The interrelationship of living things to one another and their environment; the study of such interrelationships.

**Economic Base**
Economic Base theory essentially holds that the structure of the economy is made up of two broad classes of productive effort—basic activities which produce and distribute goods and services for export to firms and individuals outside a defined localized economic area, and nonbasic activities whose goods and services are consumed at home within the boundaries of the local economic area. Viewed another way, basic activity exports goods and services and brings new dollars into the area; non-basic activity recirculates dollars within the area. This distinction holds that the reason for the growth of a particular region is its capacity to provide the means of payment for raw materials, food, and services which the region cannot produce itself and also support the nonbasic activities which are principally local in productive scope and market area. (See “Industry, Basic” and “Industry, Non-basic.”)

**Ecosystem**
An interacting system formed by a biotic community and its physical environment.

**Emergency Access Route**
A road intended to provide for ingress and egress to a area (1) for designated emergency vehicles or, (2) in times of a declared natural or other emergency. Such roads are not intended to provide for general circulation or to accommodate through traffic.

**Eminent Domain**
The right of a public entity to acquire private property for public use by condemnation, and the payment of just compensation.

**Emission Standard**
The maximum amount of pollutant legally permitted to be discharged from a single source, either mobile or stationary.

**Encourage**
To stimulate or foster a particular condition through direct or indirect action by the private sector or government agencies.

**Endangered Species**
A species of animal or plant is considered to be endangered when its prospects for survival and reproduction are in immediate jeopardy from one or more causes.

**Enhance**
To improve existing conditions by increasing the quantity or quality of beneficial uses or features.

**Environment**
CEQA defines environment as “the physical conditions which exist within the area which will be affected by a proposed project, including land, air, water, mineral, flora, fauna, noise, and objects of historic or aesthetic significance.”

**Environmental Impact Report (EIR)**
A report required of general plans by the California Environmental Quality Act and which assesses all the environmental characteristics of an area and determines what effects or impacts will result if the area is altered or disturbed by a proposed action. (See “California Environmental Quality Act.”)

**Environmental Impact Statement (EIS)**
Under the National Environmental Policy Act, a statement on the effect of development proposals and other major actions which significantly affect the environment.

**Environmentally Sensitive Areas**
Those areas of the environment, including land, air, water, minerals, flora, fauna, ambient noise, and objects of historical or aesthetic significance, which would be significantly impacted either directly or indirectly by man-made devices.
Environmentally Sensitive Lands
Those lands whose watershed characteristics; slope; geologic features; vicinity to wetlands, stream zone, or water edge; and land stability make them sensitive and would be significantly affected either directly or indirectly by man-made devices.

Erosion
(1) The loosening and transportation of rock and soil debris by wind, rain, or running water. (2) The gradual wearing away of the upper layers of earth.

Exaction
A contribution or payment required as an authorized precondition for receiving a development permit; usually refers to mandatory dedication (or fee in lieu of dedication) requirements found in many subdivision regulations.

Expansive Soils
Soils which swell when they absorb water and shrink as they dry.

Exploration
As used in the Mineral Management Chapter of the General Plan, the search for economic mineral or ore by (1) geological surveys, (2) geophysical or geochemical prospecting, (3) bore holes and trial pits, (4) surface or underground headings, drifts, or tunnels. Exploration aims at locating the presence of economic deposits and establishing their nature, shape, and grade.

Export-employment Use
An activity which produces and/or distributes goods and services for export to firms and individuals outside of the city (or county). (See Economic Base.)
Farmers Home Administration (FmHA)
A federal agency providing loans and grants for improvement projects and low-income housing in rural areas.

Farmland
Refers to eight classifications of land mapped by the U.S. Department of Agriculture Soil Conservation Service. The five agricultural classifications defined below—except Grazing Land—do not include publicly owned lands for which there is an adopted policy preventing agricultural use.

Prime Farmland
Land which has the best combination of physical and chemical characteristics for the production of crops. It has the soil quality, growing season, and moisture supply needed to produce sustained high yields of crops when treated and managed, including water management, according to current farming methods. Prime Farmland must have been used for the production of irrigated crops within the last three years.

Farmland of Statewide Importance
Land other than Prime Farmland which has a good combination of physical and chemical characteristics for the production of crops. It must have been used for the production of irrigated crops within the last three years.

Unique Farmland
Land which does not meet the criteria for Prime Farmland or Farmland of Statewide Importance, that is currently used for the production of specific high economic value crops. It has the special combination of soil quality, location, growing season, and moisture supply needed to produce sustained high quality or high yields of a specific crop when treated and managed according to current farming methods. Examples of such crops may include oranges, olives, avocados, rice, grapes, and cut flowers.

Farmland of Local Importance
Land other than Prime Farmland, Farmland of Statewide Importance, or Unique Farmland that is either currently producing crops, or that has the capability of production. This land may be important to the local economy due to its productivity.

Grazing Land
Land on which the existing vegetation, whether grown naturally or through management, is suitable for grazing or browsing of livestock. This classification does not include land previously designated as Prime Farmland, Farmland of Statewide Importance, Unique Farmland, or Farmland of Local Importance, and heavily brushed, timbered, excessively steep, or rocky lands which restrict the access and movement of livestock.

Fault
A fracture in the earth's crust forming a boundary between rock masses that have shifted.

Feasible
Capable of being done, executed, or managed successfully from the standpoint of the physical and/or financial abilities of the implementer(s).

Feasible, Technically
Capable of being implemented because the industrial, mechanical, or application technology exists.

Finding(s)
The result(s) of an investigation and the basis upon which decisions are made. Findings are used by government agents and bodies to justify action taken by the entity.

Fire Hazard Zone
An area where, due to slope, fuel, weather, or other fire-related conditions, the potential loss of life and property from a fire necessitates special fire protection measures and planning before development occurs.

Fire-resistive
Able to withstand specified temperatures for a certain period of time, such as a one-hour fire wall; not fireproof.
Fiscal Impact Analysis
A projection of the direct public costs and revenues resulting from population or employment change to the local jurisdiction(s) in which the change is taking place. Enables local governments to evaluate relative fiscal merits of general plans, specific plans, or projects.

Flood, 100-Year
The magnitude of a flood expected to occur on the average every 100 years, based on historical data. The 100-year flood has a 1/100, or one percent, chance of occurring in any given year.

Flood Insurance Rate Map (FIRM)
For each community, the official map on which the Federal Insurance Administration has delineated areas of special flood hazard and the risk premium zones applicable to that community.

Flood Plain
The relatively level land area on either side of the banks of a stream regularly subject to flooding. That part of the flood plain subject to a one percent chance of flooding in any given year is designated as an “area of special flood hazard” by the Federal Insurance Administration.

Flood Plain Fringe
All land between the floodway and the upper elevation of the 100-year flood.

Floodway
The channel of a river or other watercourse and the adjacent land areas that must be reserved in order to discharge the “base flood” without cumulatively increasing the water surface elevation more than one foot. No development is allowed in floodways.

Freeway
A high-speed, high-capacity, limited-access transportation facility serving regional and county-wide travel. Such roads are free of tolls, as contrasted with “turnpikes” or other “toll roads” now being introduced into Southern California. Freeways generally are used for long trips between major land use generators. At Level of Service “E,” they carry approximately 1,875 vehicles per lane per hour, in both directions. Major streets cross at a different grade level.

Friction Factor
Constraint applied in a traffic model to introduce an approximation of conditions that exist on streets in the city or county. These conditions reduce the speed of traffic and the desirability of specific links in the network upon which the traffic model distributes trips. Examples are frequency of low-speed curves, frequency of driveways, narrowness of lanes, and lack of turning lanes at intersections.
Glossary

Gateway
A point along a roadway entering the city or county at which a motorist gains a sense of having left the environs and of having entered the city or county.

General Plan
A compendium of city or county policies regarding long-term development, in the form of maps and accompanying text. The General Plan is a legal document required of each local agency by the State of California Government Code Section 65301 and adopted by the City Council or Board of Supervisors. In California, the General Plan has 7 mandatory elements (Circulation, Conservation, Housing, Land Use, Noise, Open Space, Safety and Seismic Safety) and may include any number of optional elements (such as Air Quality, Economic Development, Hazardous Waste, and Parks and Recreation). The General Plan may also be called a “City Plan,” “Comprehensive Plan,” or “Master Plan.”

Geologic Review
The analysis of geologic hazards, including all potential seismic hazards, surface ruptures, liquefaction, landsliding, mudsliding, and the potential for erosion and sedimentation.

Geological
Pertaining to rock or solid matter.

Goal
A general, overall, and ultimate purpose, aim, or end toward which the City or County will direct effort.

Granny Flat
(See “Second Unit.”)

Groundwater
Water under the earth’s surface, often confined to aquifers capable of supplying wells and springs.

Groundwater Recharge
The natural process of infiltration and percolation of rainwater from land areas or streams through permeable soils into water-holding rocks which provide underground storage (“aquifers”).

Growth Management
The use by a community of a wide range of techniques in combination to determine the amount, type, and rate of development desired by the community and to channel that growth into designated areas. Growth management policies can be implemented through growth rates, zoning, capital improvement programs, public facilities ordinances, urban limit lines, standards for levels of service, and other programs. (See “Congestion Management Plan.”)

Guidelines
General statements of policy direction around which specific details may be later established.
Habitat
The physical location or type of environment in which an organism or biological population lives or occurs.

Handicapped
A person determined to have a physical impairment or mental disorder expected to be of long or indefinite duration. Many such impairments or disorders are of such a nature that a person’s ability to live independently can be improved by appropriate housing conditions.

Hazardous Material
Any substance that, because of its quantity, concentration, or physical or chemical characteristics, poses a significant present or potential hazard to human health and safety or to the environment if released into the workplace or the environment. The term includes, but is not limited to, hazardous substances and hazardous wastes.

Heritage Tree or Grove
A tree or a group of hardwood trees designated by the Board of Supervisors to be of historical or cultural value, outstanding specimens, unusual species, or of significant community benefit due to size, age, or any other unique characteristic and considered to be in good health.

High Occupancy Vehicle (HOV)
Any vehicle other than a driver-only automobile (e.g., a vanpool, a bus, or two or more persons to a car).

Highway
High-speed, high-capacity, limited-access transportation facility serving regional and county-wide travel. Highways may cross at a different grade level.

Historic; Historical
An historic building or site is one that is noteworthy for its significance in local, state, or national history or culture, its architecture or design, or its works of art, memorabilia, or artifacts.

Historic Preservation
The preservation of historically significant structures and neighborhoods until such time as, and in order to facilitate, restoration and rehabilitation of the building(s) to a former condition.

Home Occupation
A commercial activity conducted by the occupants of a particular dwelling in a manner incidental to residential occupancy.

Household
All those persons—related or unrelated—who occupy a single housing unit. (See “Family.”)

Household Income Category
As used to classify households for the purpose of determining housing needs, the following categories are defined based upon DOF median income data:

- **Very Low Income Household**
  - Income not exceeding 50 percent of the median family income of the area.

- **Other Low Income Household**
  - Income between 50 and 80 percent of the median family income of the area.

- **Moderate Income Household**
  - Income between 80 and 120 percent of the median family income of the area.

- **Above Moderate Income Household**
  - Income above median family income of the area.

Householder
The head of a household.

Households, Number of
The count of all year-round housing units occupied by one or more persons. The concept of household is important because the formation of new households generates the demand for housing. Each new household formed creates the need for one additional housing unit or requires that one existing housing unit be shared by two households. Thus, household formation can continue to take place even without an increase in population, thereby increasing the demand for housing.

Housing Authority
Local housing agency established in State Law, subject to local activation and operation. Originally intended to manage certain federal subsidies, but vested with broad powers to develop and manage other forms of affordable housing.

Housing and Community Development Department of the State of California (HCD)
The State agency that has principal responsibility for assessing, planning for, and assisting communities to meet the needs of low- and moderate-income households.

Housing Element
One of the seven State-mandated elements of a local general plan, it assesses the existing and projected housing needs of all economic segments of the community, identifies potential sites adequate to provide the amount and kind of housing needed, and contains adopted goals, policies, and implementation programs for the
preservation, improvement, and development of housing. Under State law, Housing Elements must be updated every five years.

**Housing and Urban Development, U.S. Department of (HUD)**
A cabinet-level department of the federal government which administers housing and community development programs.

**Housing Unit**
The place of permanent or customary abode of a person or family. A housing unit may be a single-family dwelling, a multi-family dwelling, a condominium, a modular home, a mobile home, a cooperative, or any other residential unit considered real property under State law. A housing unit has, at least, cooking facilities, a bathroom, and a place to sleep. It also is a dwelling that cannot be moved without substantial damage or unreasonable cost. (See “Dwelling Unit,” “Family,” and “Household.”)

**Hydrocarbons**
A family of compounds containing carbon and hydrogen in various combinations. They are emitted into the atmosphere from manufacturing, storage and handling, or combustion of petroleum products and through natural processes. Certain hydrocarbons interact with nitrogen oxides in the presence of intense sunlight to form photochemical air pollution.
Identity
A consistent quality that makes a city, place, area, or building unique and gives it a distinguishing character.

Image
The mental picture or impression of a city or place taken from memory and held in common by members of the community.

Impact
The effect of any direct man-made actions or indirect repercussions of man-made actions on existing physical, social, or economic conditions.

Impact Fee
A fee, also called a development fee, levied on the developer of a project by a city, county, or other public agency as compensation for otherwise-unmitigated impacts the project will produce. California Government Code Section 66000, et seq, specifies that development fees shall not exceed the estimated reasonable cost of providing the service for which the fee is charged. To lawfully impose a development fee, the public agency must verify its method of calculation and document proper restrictions on use of the fund.

Impervious Surface
Surface through which water cannot penetrate, such as roof, road, sidewalk, and paved parking lot. The amount of impervious surface increases with development and establishes the need for drainage facilities to carry the increased runoff.

Implementation
Actions, procedures, programs, or techniques that carry out policies.

Improvement
The addition of one or more structures or utilities on a parcel of land.

Incompatible General Plan Designations
As used in the Mineral Management Chapter of the General Plan, those Nevada County General Plan designations incompatible for surface mining, including the following:
- Urban High Density
- Urban Medium Density
- Urban Single-Family
- Residential
- Estate
- Community Commercial
- Rural Commercial
- Neighborhood Commercial
- Highway Commercial
- Office-Professional
- Business Park
- Service Commercial
- Recreation
- Open Space
- Special Development Area
- Planned Residential Community
- Village Business Park

Incompatible Land Use
As used in the Mineral Management Chapter of the General Plan, land uses inherently incompatible with surface mining or surface access to subsurface mining. Generally, this is land with significant public or private investment in structures, land improvements, and landscaping and that may prevent mining because of the greater economic value of the land and its improvements. Examples of such uses may include, but shall not be limited to, high density residential, low density residential, public facilities, and commercial.

Incorporation
Creation of a new town or city.

Incubator Space
Retail or industrial space that is affordable to new, low-margin businesses.

Industrial
The manufacture, production, and processing of consumer goods. Industrial is often divided into "heavy industrial" uses, such as construction yards, quarrying, and factories; and "light industrial" uses, such as research and development and less intensive warehousing and manufacturing.

Industry, Basic
The segment of economic activity that brings dollars to a region from other areas. Traditional examples are manufacturing, mining and agriculture. The products of all of these activities are exported (sold) to other regions. The money thus brought into the local economy is used to purchase locally-provided goods and services as well as items that are not available locally and that must be imported from other regions. Other, less traditional examples of basic industry are tourism, higher education, and retirement activities that also bring new money into a region.
Industry, Non-basic
The segment of economic activity that is supported by the circulation of dollars within a region. Examples are the wholesale, retail, and service functions that supply goods and services to local sources of demand such as businesses, public agencies, and households.

Infill Development
Development of vacant land (usually individual lots or leftover properties) within areas that are already largely developed.

Infrastructure
Public services and facilities, such as sewage-disposal systems, water-supply systems, other utility systems, and roads.

Institutional Use
(1) Publicly or privately owned and operated activities such as hospitals, museums, and schools; (2) churches and other religious organizations; and (3) other nonprofit activities of a welfare, educational, or philanthropic nature that can not be considered a residential, commercial, or industrial activity.

Inter-agency
Indicates cooperation between or among two or more discrete agencies in regard to a specific program.

Interest, Fee
Entitles a land owner to exercise complete control over use of land, subject only to government land use regulations.

Interest, Less-than-fee
The purchase of interest in land rather than outright ownership; includes the purchase of development rights via conservation, open space, or scenic easements. (See “Development Rights,” “Easement, Scenic,” “Lease,” and “Leasehold Interest.”)

Intermittent Stream
A stream that normally flows for at least thirty (30) days after the last major rain of the season and is dry a large part of the year.

Issues
Important unsettled community matters or problems that are identified in a community’s general plan and dealt with by the plan’s goals, objectives, policies, plan proposals, and implementation programs.
**Jobs/Housing Balance; Jobs/Housing Ratio**

The availability of affordable housing for employees. The jobs/housing ratio divides the number of jobs in an area by the number of employed residents. A ratio of 1.0 indicates a balance. A ratio greater than 1.0 indicates a net in-commute; less than 1.0 indicates a net out-commute.

**Joint Powers Authority (JPA)**

A legal arrangement that enables two or more units of government to share authority in order to plan and carry out a specific program or set of programs that serves both units.
Land Banking
The purchase of land by a local government for use or resale at a later date. “Banked lands” have been used for development of low- and moderate-income housing, expansion of parks, and development of industrial and commercial centers. Federal rail-banking law allows railroads to bank unused rail corridors for future rail use while allowing interim use as trails.

Landmark
(1) Refers to a building, site, object, structure, or significant tree, having historical, architectural, social, or cultural significance and marked for preservation by the local, state, or federal government. (2) A visually prominent or outstanding structure or natural feature that functions as a point of orientation or identification.

Landmark Trees, Oaks or Groves
Trees or groves whose size, visual impact, or association with a historically significant structure or event have caused them to be marked for preservation by the local, state, or federal government.

Landscaping
Planting—including trees, shrubs, and ground covers—suitably designed, selected, installed, and maintained as to enhance a site or roadway permanently.

Landslide
A general term for a falling mass of soil or rocks.

Land Use
The occupation or utilization of land or water area for any human activity or any purpose defined in the General Plan.

Land Use Element
A required element of the General Plan that uses text and maps to designate the future use or reuse of land within a given jurisdiction’s planning area. The land use element serves as a guide to the structuring of zoning and subdivision controls, urban renewal and capital improvements programs, and to official decisions regarding the distribution and intensity of development and the location of public facilities and open space. (See "Mandatory Elements.")

Land Use Regulation
A term encompassing the regulation of land in general and often used to mean those regulations incorporated in the General Plan, as distinct from zoning regulations (which are more specific).

Ldn
Day-Night Average Sound Level. The A-weighted average sound level for a given area (measured in decibels) during a 24-hour period with a 10 dB weighting applied to nighttime sound levels. The $L_{dn}$ is approximately numerically equal to the CNEL for most environmental settings.

Lease
A contractual agreement by which an owner of real property (the lessor) gives the right of possession to another (a lessee) for a specified period of time (term) and for a specified consideration (rent).

Leasehold Interest
(1) The interest which the lessee has in the value of the lease itself in condemnation award determination. (2) The difference between the total remaining rent under the lease and the rent the lessee would currently pay for similar space for the same time period.

Leq
The energy equivalent level, defined as the average sound level on the basis of sound energy (or sound pressure squared). The $L_{eq}$ is a “dosage” type measure and is the basis for the descriptors used in current standards, such as the 24-hour CNEL used by the State of California.

Level of Service (LOS)
(1) A scale that measures the amount of traffic a roadway may be capable of handling on a roadway or at the intersection of roadways. Levels range from A to F, with A representing the highest level of service, as follows:

Level of Service A
Indicates a relatively free flow of traffic, with little or no limitation on vehicle movement or speed.

Level of Service B
Describes a steady flow of traffic, with only slight delays in vehicle movement and speed. All queues clear in a single signal cycle.

Level of Service C
Denotes a reasonably steady, high-volume flow of traffic, with some limitations on movement and speed, and occasional backups on critical approaches.

Level of Service D
The level where traffic nears an unstable flow. Intersections still function, but
short queues develop and cars may have to wait through one cycle during short peaks.

**Level of Service E**
Traffic characterized by slow movement and frequent (although momentary) stoppages. This type of congestion is considered severe, but is not uncommon at peak traffic hours, with frequent stopping, long-standing queues, and blocked intersections.

**Level of Service F**
Describes unsatisfactory stop-and-go traffic characterized by “traffic jams” and stoppages of long duration. Vehicles at signalized intersections usually have to wait through one or more signal changes, and “upstream” intersections may be blocked by the long queues.

(2) Some communities in California are developing standards for levels of service relating to municipal functions such as police, fire, and library service. These standards are incorporated in the General Plan or in separate “Level of Service Plans.”

**Liquefaction**
The transformation of loose water-saturated granular materials (such as sand or silt) from a solid into a liquid state. A type of ground failure that can occur during an earthquake.

**Local Agency Formation Commission (LAFCo)**
A five- or seven-member commission within each county that reviews and evaluates all proposals for formation of special districts, incorporation of cities, annexation to special districts or cities, consolidation of districts, and merger of districts with cities. Each county’s LAFCo is empowered to approve, disapprove, or conditionally approve such proposals. The LAFCo members generally include two county supervisors, two city council members, and one member representing the general public. Some LAFCos include two representatives of special districts.
Glossary

Maintain, v.
To keep in an existing state. (See “Preserve, v.”)

Mandatory Element
A component of the General Plan mandated by State law. California State law requires that a General Plan include elements dealing with seven subjects—circulation, conservation, housing, land use, noise, open space, and safety—and specifies to various degrees the information to be incorporated in each element. (See "Land Use Element.")

May
That which is permissible.

Mello-Roos Bonds
Locally issued bonds that are repaid by a special tax imposed on property owners within a “community facilities” district established by a governmental entity. The bond proceeds can be used for public improvements and for a limited number of services. Named after the program’s legislative authors.

Mercalli Intensity Scale
A subjective measure of the observed effects (human reactions, structural damage, geologic effects) of an earthquake. Expressed in Roman numerals from I to XII.

Merger (District)
Elimination of a special district by transferring its service responsibilities to a city government. The merging district’s territory must be totally included inside the city.

Metropolitan
Of, relating to, or characteristic of a large important city.

Microclimate
The climate of a small, distinct area, such as a city street or a building’s courtyard; can be favorably altered through functional landscaping, architecture, or other design features.

Mineral
In this document the word mineral is used in a non-technical sense to embrace all inorganic and organic substances that are excavated from the earth for use by man.

Mineral Extraction "ME" Combining Zoning District
A district intended to protect those areas where information indicates that mineral deposits are present and to forewarn potential land users of the possibility the property has mineral values and may be mined. This District shall be used for those lands classified by State Classification Reports as MRZ-2 or similar documentation.

Mineral Resource Zones (MRZs)
Zones used by the State Mining and Geology Board within State Classification Reports to classify mineral resource deposits:

- MRZ-1 areas where adequate information indicates that no significant mineral deposits are likely present.
- MRZ-2 areas where adequate information indicates that significant mineral deposits are likely present.
- MRZ-3 areas containing mineral deposits the significance of which cannot be evaluated from available data.
- MRZ-4 areas where available data is inadequate for assignment to any other MRZ zone.

Scientific Resource Zone (SZ) areas containing unique or rare occurrences of rocks, minerals, or fossils that are of outstanding scientific significance.

Mineral Resource
Land on which known deposits of commercially viable mineral or aggregate deposits exist. This designation is applied to sites determined by the State Division of Mines and Geology as being a resource of regional significance, and is intended to help maintain the quarrying operations and protect them from encroachment of incompatible land uses.

Minimize
To reduce or lessen, but not necessarily to eliminate.

Mining
The act or process of extracting resources, such as coal, oil, or minerals, from the earth.

Ministerial (Administrative) Decision
An action taken by a governmental agency which follows established procedures and rules and does not call for the exercise of judgment in deciding whether to approve a project.

Mitigate
To ameliorate, alleviate, or avoid to the extent reasonably feasible.

Mixed-use
Properties on which various uses, such as office, commercial, institutional, and residential, are combined in a single building or on a single site in an integrated development project with significant functional interrelationships and a coherent physical design. A “single site” may include contiguous properties.
Moderate-income Household
A household with an annual income between the lower income eligibility limits and 120 percent of the area median family income adjusted by household size, usually as established by the U.S. Department of Housing and Urban Development (HUD) for the Section 8 housing program. (See “Area” and “Low-income Household.”)

Multiple Family Building
A detached building designed and used exclusively as a dwelling by three or more families occupying separate suites.

Multiplier Effect
The recirculation of money through the economy multiplies its impact on jobs and income. For example, money paid as salaries to industrial and office workers is spent on housing, food, clothes and other locally-available goods and services. This spending creates jobs in housing construction, retail stores (e.g., grocery and drug stores) and professional offices. The wage paid to workers in those industries is again re-spent, creating still more jobs. Overall, one job in basic industry is estimated to create approximately one more job in non-basic industry.

Must
That which is mandatory.
Glossary

National Ambient Air Quality Standards
The prescribed level of pollutants in the outside air that cannot be exceeded legally during a specified time in a specified geographical area.

National Environmental Policy Act (NEPA)
An act passed in 1974 establishing federal legislation for national environmental policy, a council on environmental quality, and the requirements for environmental impact statements.

National Flood Insurance Program
A federal program which authorizes the sale of federally subsidized flood insurance in communities where such flood insurance is not available privately.

National Historic Preservation Act
A 1966 federal law that established a National Register of Historic Places and the Advisory Council on Historic Preservation, and which authorized grants-in-aid for preserving historic properties.

National Register of Historic Places
The official list, established by the National Historic Preservation Act, of sites, districts, buildings, structures, and objects significant in the nation’s history or whose artistic or architectural value is unique.

Natural State
The condition existing prior to development.

Necessary
Essential or required.

Need
A condition requiring supply or relief. The City or County may act upon findings of need within or on behalf of the community.

Neighborhood Park
City- or county-owned land intended to serve the recreation needs of people living or working within one-half mile radius of the park.

Nitrogen Oxide(s)
A reddish brown gas that is a byproduct of combustion and ozone formation processes. Often referred to as NOX, this gas gives smog its “dirty air” appearance.

Noise
Any sound which is undesirable because it interferes with speech and hearing, or is intense enough to damage hearing, or is otherwise annoying. Noise, simply, is “unwanted sound.”

Noise Attenuation
Reduction of the level of a noise source using a substance, material, or surface, such as earth berms and/or solid concrete walls.

Noise Contour
A line connecting points of equal noise level as measured on the same scale. Noise levels greater than the 60 Ldn contour (measured in dBA) require noise attenuation in residential development.

Noise Element
One of the seven State-mandated elements of a local general plan, it assesses noise levels of highways and freeways, local arterials, railroads, airports, local industrial plants, and other ground stationary sources, and adopts goals, policies, and implementation programs to reduce the community’s exposure to noise.

Non-attainment
The condition of not achieving a desired or required level of performance. Frequently used in reference to air quality.

Non-conforming Use
A use which was valid when brought into existence, but by subsequent regulation becomes no longer conforming. “Non-conforming use” is a generic term and includes (1) non-conforming structures (by virtue of size, type of construction, location on land, or proximity to other structures), (2) non-conforming use of a conforming building, (3) non-conforming use of a non-conforming building, and (4) non-conforming use of land. Thus, any use lawfully existing on any piece of property that is inconsistent with a new or amended General Plan, and that in turn is a violation of a zoning ordinance amendment subsequently adopted in conformance with the General Plan, will be a non-conforming use. Typically, non-conforming uses are permitted to continue for a designated period of time, subject to certain restrictions.

Notice (of Hearing)
A legal document announcing the opportunity for the public to present their views to an official representative or board of a public agency concerning an official action pending before the agency.
Objective
A specific statement of desired future condition toward which the City or County will expend effort in the context of striving to achieve a broader goal. An objective should be achievable and, where possible, should be measurable and time-specific. The State Government Code (§65302) requires that general plans spell out the “objectives,” principles, standards, and proposals of the general plan. “The addition of 100 units of affordable housing by 1995” is an example of an objective.

Office Use
The use of land by general business offices, medical and professional offices, administrative or headquarters offices for large wholesaling or manufacturing operations, and research and development.

Official County Scenic Highway
A segment of state highway identified in the Master Plan of State Highways Eligible for Official Scenic Highway Designation and designated by the Director of the Department of Transportation (Caltrans).

Open Space Element
One of the seven State-mandated elements of a local general plan, it contains an inventory of privately and publicly owned open-space lands, and adopted goals, policies, and implementation programs for the preservation, protection, and management of open space lands.

Open Space Land
Any parcel or area of land or water which is essentially unimproved and devoted to an open space use for the purposes of (1) the preservation of natural resources, (2) the managed production of resources, (3) outdoor recreation, or (4) public health and safety.

Orchard
A group of fruit or nut trees, either small and diverse and grown for home use, or large and uniform (i.e., of one variety) and cultivated for revenue. Such a collection must be planted, managed and renewed by the householder or farmer and should not be confused with a naturally occurring grove. Citrus and nut plantations are customarily called groves.

Ordinance
A law or regulation set forth and adopted by a governmental authority, usually a city or county.

Outdoor Recreation Use
A privately or publicly owned or operated use providing facilities for outdoor recreation activities.

Outer Approach Zone
Airspace in which an air-traffic controller initiates radar monitoring for incoming flights approaching an airport.

Overlay
A land use designation on the Land Use Map, or a zoning designation on a zoning map, which modifies the basic underlying designation in some specific manner.

Ozone
A tri-atomic form of oxygen (O3) created naturally in the upper atmosphere by a photochemical reaction with solar ultraviolet radiation. In the lower atmosphere, ozone is a recognized air pollutant that is not emitted directly into the environment, but is formed by complex chemical reactions between oxides of nitrogen and reactive organic compounds in the presence of sunlight, and becomes a major agent in the formation of smog.
Glossary

Parcel
A lot, or contiguous group of lots, in single ownership or under single control, usually considered a unit for purposes of development.

Parks
Open space lands whose primary purpose is recreation. (See “Open Space Land,” “Community Park,” and “Neighborhood Park.”)

Passive Solar System
A system that distributes collected heat via direct transfer from a thermal mass rather than mechanical power. Passive systems rely on building design and materials to collect and store heat and to create natural ventilation for cooling. (See “Active Solar System.”)

Peak Hour/Peak Period
For any given roadway, a daily period during which traffic volume is highest, usually occurring in the morning and evening commute periods. Where “F” Levels of Service are encountered, the “peak hour” may stretch into a “peak period” of several hours’ duration.

Performance Standards
Zoning regulations that permit uses based on a particular set of standards of operation rather than on particular type of use. Performance standards provide specific criteria limiting noise, air pollution, emissions, odors, vibration, dust, dirt, glare, heat, fire hazards, wastes, traffic impacts, and visual impact of a use.

Personal Services
Services of a personal convenience nature, as opposed to products which are sold to individual consumers, as contrasted with companies. Personal services include barber and beauty shops, shoe and luggage repair, fortune tellers, photographers, laundry and cleaning services and pick-up stations, copying, repair and fitting of clothes, and similar services.

Physical Diversity
A quality of a site, city, or region in which are found a variety of architectural styles, natural landscapes, and/or land uses.

Policy
A specific statement of principle or of guiding actions which implies clear commitment but is not mandatory. A general direction that a governmental agency sets to follow, in order to meet its goals and objectives before undertaking an action program. (See “Program.”)

Pollutant
Any introduced gas, liquid, or solid that makes a resource unfit for its normal or usual purpose.

Pollution
The presence of matter or energy whose nature, location, or quantity produces undesired environmental effects.

Pollution, Non-Point
Sources for pollution which are less definable and usually cover broad areas of land, such as agricultural land with fertilizers which are carried from the land by runoff, or automobiles.

Pollution, Point
In reference to water quality, a discrete source from which pollution is generated before it enters receiving waters, such as a sewer outfall, a smokestack, or an industrial waste pipe.

Poverty Level
As used by the U.S. Census, families and unrelated individuals are classified as being above or below the poverty level based on a poverty index which provides a range of income cutoffs or “poverty thresholds” varying by size of family, number of children, and age of householder. The income cutoffs are updated each year to reflect the change in the Consumer Price Index.

Preserve
An area in which beneficial uses in their present condition are protected; for example, a nature preserve or an agricultural preserve. (See “Agricultural Preserve” and Protect.”)

Preserve
To keep safe from destruction or decay; to maintain or keep intact. (See “Maintain.”)

Principle
An assumption, fundamental rule, or doctrine that will guide general plan policies, proposals, standards, and implementation measures. The State Government Code (§65302) requires that general plans spell out the objectives, “principles,” standards, and proposals of the general plan. “Adjacent land uses should be compatible with one another” is an example of a principle.

Professional Offices
A use providing professional or consulting services in the fields of law, medicine, architecture, design, engineering, accounting, and similar professions, but not including financial institutions or real estate or insurance offices.
Program
An action, activity, or strategy carried out in response to adopted policy to achieve a specific goal or objective. Policies and programs establish the “who,” “how” and “when” for carrying out the “what” and “where” of goals and objectives.

Pro Rata
Refers to the proportionate distribution of something to some thing or some group, such as the cost of infrastructure improvements associated with new development apportioned to the users of the infrastructure on the basis of projected use.

Protect
To maintain and preserve beneficial uses in their present condition as nearly as possible. (See “Enhance.”)

Public and Quasi-public Facilities
Institutional, academic, governmental and community service uses, either publicly owned or operated by non-profit organizations.
Glossary

Ranchette
A single dwelling unit occupied by a non-farming household on a parcel of 2.5 to 20 acres which has been subdivided from agricultural land.

Rare or Endangered Species
A species of animal or plant listed in: Sections 670.2 or 670.5, Title 14, California Administrative Code; or Title 50, Code of Federal Regulations, Section 17.11 or Section 17.2, pursuant to the Federal Endangered Species Act designating species as rare, threatened, or endangered.

Reclamation
The reuse of resources, usually those present in solid wastes or sewage.

Recognize
To officially (or by official action) identify or perceive a given situation.

Recreation, Active
A type of recreation or activity which requires the use of organized play areas including, but not limited to, softball, baseball, football and soccer fields, tennis and basketball courts and various forms of children's play equipment.

Recreation, Passive
Type of recreation or activity which does not require the use of organized play areas.

Recreational Mining
The extraction of minerals primarily for recreation on a seasonal basis and using such devices as pans, rockers, and dredges with intakes less than or equal to eight inches in diameter.

Recycle, v.
The process of extraction and reuse of materials from waste products.

Redevelop, v.
To demolish existing buildings; or to increase the overall floor area existing on a property; or both; irrespective of whether a change occurs in land use.

Regional
Pertaining to activities or economies at a scale greater than that of a single jurisdiction, and affecting a broad geographic area.

Regional Housing Needs Plan
A quantification by a COG or by HCD of existing and projected housing need, by household income group, for all localities within a region.

Regional Park
A park typically 150-500 acres in size focusing on activities and natural features not included in most other types of parks and often based on a specific scenic or recreational opportunity.

Regulation
A rule or order prescribed for managing government.

Residential, Multiple Family
Usually three or more dwelling units on a single site, which may be in the same or separate buildings.

Residential, Single-Family
A single dwelling unit on a building site.

Resources, Non-renewable
Refers to natural resources, such as fossil fuels and natural gas, which, once used, cannot be replaced and used again.

Restore
To renew, rebuild, or reconstruct to a former state.

Restrict
To check, bound, or decrease the range, scope, or incidence of a particular condition.

Retention Basin/Retention Pond
(See “Detention Basin/Detention Pond.”)

Retrofit
To add materials and/or devices to an existing building or system to improve its operation or efficiency. Buildings have been retrofitted to use solar energy and to strengthen their ability to withstand earthquakes, for example.

Rezoning
An amendment to the map and/or text of a zoning ordinance to effect a change in the nature, density, or intensity of uses allowed in a zoning district and/or on a designated parcel or land area.

Richter Scale
A measure of the size or energy release of an earthquake at its source. The scale is logarithmic; the wave amplitude of each number on the scale is 10 times greater than that of the previous whole number.

Rideshare
A travel mode other than driving alone, such as buses, rail transit, carpools, and vanpools.

Ridgeline
A line connecting the highest points along a ridge and separating drainage basins or small-scale drainage systems from one another.
Right-of-way
A strip of land occupied or intended to be occupied by certain transportation and public use facilities, such as roadways, railroads, and utility lines.

Riparian Lands
Riparian lands are comprised of the vegetative and wildlife areas adjacent to perennial and intermittent streams. Riparian areas are delineated by the existence of plant species normally found near freshwater.

Risk
The danger or degree of hazard or potential loss.

Runoff
That portion of rain or snow which does not percolate into the ground and is discharged into streams instead.
Safety Element
One of the seven State-mandated elements of a local general plan, it contains adopted goals, policies, and implementation programs for the protection of the community from any unreasonable risks associated with seismic and geologic hazards, flooding, and wildland and urban fires. Many safety elements also incorporate a review of police needs, objectives, facilities, and services.

Sanitary Landfill
The controlled placement of refuse within a limited area, followed by compaction and covering with a suitable thickness of earth and other containment material.

Sanitary Sewer
A system of subterranean conduits which carries refuse liquids or waste matter to a plant where the sewage is treated, as contrasted with storm drainage systems (which carry surface water) and septic tanks or leech fields (which hold refuse liquids and waste matter on-site). (See “Combined Sewer” and “Septic System.”)

Scenic Highway Corridor
The area outside a highway right-of-way that is generally visible to persons travelling on the highway.

Scenic Highway/Scenic Route
A highway, road, drive, or street which, in addition to its transportation function, provides opportunities for the enjoyment of natural and man-made scenic resources and access or direct views to areas or scenes of exceptional beauty or historic or cultural interest. The aesthetic values of scenic routes often are protected and enhanced by regulations governing the development of property or the placement of outdoor advertising. Until the mid-1980s, general plans in California were required to include a Scenic Highways element.

Second Unit
A Self-contained living unit, either attached to or detached from, and in addition to, the primary residential unit on a single lot. Sometimes called “Granny Flat”.

Section 8 Rental Assistance Program
A federal (HUD) rent-subsidy program that is one of the main sources of federal housing assistance for low-income households. The program operates by providing “housing assistance payments” to owners, developers, and public housing agencies to make up the difference between the “Fair Market Rent” of a unit (set by HUD) and the household’s contribution toward the rent, which is calculated at 30 percent of the household’s adjusted gross monthly income (GMI). “Section 8” includes programs for new construction, existing housing, and substantial or moderate housing rehabilitation.

Seiche
An earthquake-generated wave in an enclosed body of water such as a lake, reservoir, or bay.

Seismic
Caused by or subject to earthquakes or earth vibrations.

Senior Housing
(See “Elderly Housing.”)

Seniors
Persons age 62 and older.

Septic System
A sewage-treatment system that includes a settling tank through which liquid sewage flows and in which solid sewage settles and is decomposed by bacteria in the absence of oxygen. Septic systems are often used for individual-home waste disposal where an urban sewer system is not available. (See “Sanitary Sewer.”)

Setback
The horizontal distance between the property line and any structure.

Settlement
1. The drop in elevation of a ground surface caused by settling or compacting. 2. The gradual downward movement of an engineered structure due to compaction. Differential settlement is uneven settlement, where one part of a structure settles more or at a different rate than another part.

Shall
That which is obligatory or necessary.

Shared Living
The occupancy of a dwelling unit by persons of more than one family in order to reduce housing expenses and provide social contact, mutual support, and assistance. Shared living facilities serving six or fewer persons are permitted in all residential districts by §1566.3 of the California Health and Safety Code.

Shopping Center
A group of commercial establishments, planned, developed, owned, or managed as a unit, with common off-street parking provided on the site.

Should
Signifies a directive to be honored if at all possible.
**Sign**

Any representation (written or pictorial) used to convey information, or to identify, announce, or otherwise direct attention to a business, profession, commodity, service, or entertainment, and placed on, suspended from, or in any way attached to, any structure, vehicle, or feature of the natural or manmade landscape.

**Significant Effect**

A beneficial or detrimental impact on the environment. May include, but is not limited to, significant changes in an area’s air, water, and land resources.

**Siltation**

(1) The accumulating deposition of eroded material. (2) The gradual filling in of streams and other bodies of water with sand, silt, and clay.

**Single-family Dwelling, Attached**

A dwelling unit occupied or intended for occupancy by only one household that is structurally connected with at least one other such dwelling unit. (See “Townhouse.”)

**Single-family Dwelling, Detached**

A dwelling unit occupied or intended for occupancy by only one household that is structurally independent from any other such dwelling unit or structure intended for residential or other use. (See “Family.”)

**Site**

A parcel of land used or intended for one use or a group of uses and having frontage on a public or an approved private street. A lot. (See “Lot.”)

**Slope**

Land gradient described as the vertical rise divided by the horizontal run, and expressed in percent.

**SMARA**

State Surface Mining and Reclamation Act of 1975.

**Soil**

The unconsolidated material on the immediate surface of the earth created by natural forces that serves as natural medium for growing land plants.

**Solar Access**

The provision of direct sunlight to an area specified for solar energy collection when the sun’s azimuth is within 45 degrees of true south.

**Solar System, Active**

A system using a mechanical device, such as a pump or a fan, and energy in addition to solar energy to transport a conductive medium (air or water) between a solar collector and the interior of a building for the purpose of heating or cooling.

**Solar System, Passive**

A system that uses direct heat transfer from thermal mass instead of mechanical power to distribute collected heat. Passive systems rely on building design and materials to collect and store heat and to create natural ventilation for cooling.

**Solid Waste**

Any unwanted or discarded material that is not a liquid or gas. Includes organic wastes, paper products, metals, glass, plastics, cloth, brick, rock, soil, leather, rubber, yard wastes, and wood, but does not include sewage and hazardous materials. Organic wastes and paper products comprise about 75 percent of typical urban solid waste.

**Specific Plan**

Under Article 8 of the Government Code (§65450 et seq), a legal tool for detailed design and implementation of a defined portion of the area covered by a General Plan. A specific plan may include all detailed regulations, conditions, programs, and/or proposed legislation which may be necessary or convenient for the systematic implementation of any General Plan element(s).

**Speed, Average**

The sum of the speeds of the cars observed divided by the number of cars observed.

**Sphere of Influence**

The probable ultimate physical boundaries and service area of a local agency (city or district) as determined by the Local Agency Formation Commission (LAFCo) of the County.

**Standards**

(1) A rule or measure establishing a level of quality or quantity that must be complied with or satisfied. The State Government Code (§65302) requires that general plans spell out the objectives, principles, “standards,” and proposals of the general plan. Examples of standards might include the number of acres of park land per 1,000 population that the community will attempt to acquire and improve, or the “traffic Level of Service” (LOS) that the plan hopes to attain. (2) Requirements in a zoning ordinance that govern building and development as distinguished from use restrictions—for example, site-design regulations such as lot area, height limit, frontage, landscaping, and floor area ratio.
Storm Runoff
Surplus surface water generated by rainfall that does not seep into the earth but flows overland to flowing or stagnant bodies of water.

Streets, Local
(See “Streets, Minor.”)

Streets, Major
The transportation network which includes a hierarchy of freeways, arterials, and collectors to service through traffic.

Streets, Minor
Local streets not shown on the Circulation Plan, Map, or Diagram, whose primary intended purpose is to provide access to fronting properties.

Streets, Through
Streets which extend continuously between other major streets in the community.

Structure
Anything constructed or erected which requires location on the ground (excluding swimming pools, fences, and walls used as fences).

Subdivision
The division of a tract of land into defined lots, either improved or unimproved, which can be separately conveyed by sale or lease, and which can be altered or developed. “Subdivision” includes a condominium project as defined in Section 1350 of the California Civil Code.

Subdivision Map Act
Division 2 (Sections 66410 et seq) of the California Government code, this act vests in local legislative bodies the regulation and control of the design and improvement of subdivisions, including the requirement for tentative and final maps. (See “Subdivision.”)

Subregional
Pertaining to a portion of a region. The Golden Triangle is a subregional task force.

Subsidence
The gradual settling or sinking of an area with little or no horizontal motion. (See “Settlement.”)

Subsidize
To assist by payment of a sum of money or by the granting of terms or favors that reduce the need for monetary expenditures. Housing subsidies may take the forms of mortgage interest deductions or tax credits from federal and/or state income taxes, sale or lease at less than market value of land to be used for the construction of housing, payments to supplement a minimum affordable rent, and the like.

Substantial
Considerable in importance, value, degree, or amount.

Subsurface Mining
The extraction of minerals by underground means, including shafts, slopes, adits, drifts, crosscuts, winzes, raises, and stopes.

Surface Mining
The extraction of minerals by open-pit mining, quarrying, dredging, and related operations on the surface, including comminution, concentration, processing, waste disposal, and tailings disposal. Said extraction shall not include the processing and use of on-site aggregate for on-site construction.

Surface Access to Subsurface Mines
The surface facilities serving an underground mine may include headframes, hoists, service plant, support buildings, comminution, concentration, processing, waste disposal, tailings disposal, and on-site roads.
Tailings
The gangue and other refuse material resulting from the washing, concentration or treatment of ground ore. The slurry is transported to a tailings pond, the solids settling while the liquid may be withdrawn.

Tax Increment
Additional tax revenues that result from increases in property values within a redevelopment area. State law permits the tax increment to be earmarked for redevelopment purposes but requires at least 20 percent of be used to increase and improve the community’s supply of very low- and low-income housing.

Thermal Mass
Large quantities of heavy or dense material with a high heat capacity, used in solar buildings to absorb heat, which is then stored and re-radiated as needed for heating and cooling.

Topography
Configuration of a surface, including its relief and the position of natural and man-made features.

Tourism
The business of providing services for persons traveling for pleasure, tourism contributes to the vitality of the community by providing revenue to local business. Tourism can be measured through changes in the transient occupancy tax, or restaurant sales.

Traffic Model
A mathematical representation of traffic movement within an area or region based on observed relationships between the kind and intensity of development in specific areas. Many traffic models operate on the theory that trips are produced by persons living in residential areas and are attracted by various non-residential land uses. (See “Trip.”)

Transit
The conveyance of persons or goods from one place to another by means of a local, public transportation system.

Transit-dependent
Refers to persons unable to operate automobiles or other motorized vehicles, or those who do not own motorized vehicles. Transit-dependent citizens must rely on transit, para-transit, or owners of private vehicles for transportation. Transit-dependent citizens include the young, the handicapped, the elderly, the poor, and those with prior violations in motor vehicle laws.

Transit, Public
A system of regularly-scheduled buses and/or trains available to the public on a fee-per-ride basis. Also called “Mass Transit.”

Transition Zone
Controlled airspace extending upward from 700 or more feet above the ground wherein procedures for aircraft approach have been designated. The transition zone lies closer to an airport than the outer approach zone and outside of the inner approach zone. (See “Approach Zone” and “Outer Approach Zone.”)

Transitional Housing
Shelter provided to the homeless for an extended period, often as long as 18 months, and generally integrated with other social services and counseling programs to assist in the transition to self-sufficiency through the acquisition of a stable income and permanent housing. (See “Homeless” and “Emergency Shelter.”)

Transportation Demand Management (TDM)
A strategy for reducing demand on the road system by reducing the number of vehicles using the roadways and/or increasing the number of persons per vehicle. TDM attempts to reduce the number of persons who drive alone on the roadway during the commute period and to increase the number in carpools, vanpools, buses and trains, walking, and biking. TDM can be an element of TSM (see below).

Transportation Systems Management (TSM)
A comprehensive strategy developed to address the problems caused by additional development, increasing trips, and a shortfall in transportation capacity. Transportation Systems Management focuses on more efficiently utilizing existing highway and transit systems rather than expanding them. TSM measures are characterized by their low cost and quick implementation time frame, such as computerized traffic signals, metered freeway ramps, and one-way streets.

Trees, Street
Trees strategically planted--usually in parkway strips, medians, or along streets--to enhance the visual quality of a street.

Trip
A one-way journey that proceeds from an origin to a destination via a single mode of transportation; the smallest unit of movement considered in transportation studies. Each trip has one “production end,” (or origin—often
Trip Generation

The dynamics that account for people making trips in automobiles or by means of public transportation. Trip generation is the basis for estimating the level of use for a transportation system and the impact of additional development or transportation facilities on an existing local transportation system. Trip generations of households are correlated with destinations that attract household members for specific purposes.

Truck Route

A path of circulation required for all vehicles exceeding set weight or axle limits, a truck route follows major arterials through commercial or industrial areas and avoids sensitive areas.
Undue
Improper, or more than necessary.

Uniform Building Code (UBC)
A national, standard building code which sets forth minimum standards for construction.

Uniform Housing Code (UHC)
State housing regulations governing the condition of habitable structures with regard to health and safety standards, and which provide for the conservation and rehabilitation of housing in accordance with the Uniform Building Code (UBC).

Urban Design
The attempt to give form, in terms of both beauty and function, to selected urban areas or to whole cities. Urban design is concerned with the location, mass, and design of various urban components and combines elements of urban planning, architecture, and landscape architecture.

Urban Open Space
The absence of buildings or development, usually in well-defined volumes, within an urban environment.

Urban Services
Utilities (such as water, gas, electricity, and sewer) and public services (such as police, fire, schools, parks, and recreation) provided to an urbanized or urbanizing area.

Urban Sprawl
Haphazard growth or outward extension of a city resulting from uncontrolled or poorly managed development.

Use
The purpose for which a lot or structure is or may be leased, occupied, maintained, arranged, designed, intended, constructed, erected, moved, altered, and/or enlarged in accordance with the City’s or County’s zoning ordinance and General Plan land use designations.

Use, Non-conforming
(See “Non-conforming Use.”)

Use Permit, Conditional
The discretionary and conditional review of an activity or function or operation on a site or in a building or facility.

Utility Corridors
Rights-of-way or easements for utility lines on either publicly or privately owned property. (See “Right-of-way” or “Easement.”)
Vacant
Lands or buildings which are not actively used for any purpose.

Variance
A departure from any provision of the zoning requirements for a specific parcel, except use, without changing the zoning ordinance or the underlying zoning of the parcel. A variance usually is granted only upon demonstration of hardship based on the peculiarity of the property in relation to other properties in the same zone district.

Vehicle-Miles Travelled (VMT)
A key measure of overall street and highway use. Reducing VMT is often a major objective in efforts to reduce vehicular congestion and achieve regional air quality goals.

Very Low-income Household
A household with an annual income usually no greater than 50 percent of the area median family income adjusted by household size, as determined by a survey of incomes conducted by a city or a county, or in the absence of such a survey, based on the latest available eligibility limits established by the U.S. Department of Housing and Urban Development (HUD) for the Section 8 housing program. (See “Area.”)

Viewshed
The area within view from a defined observation point.
Warehousing Use
A use engaged in storage, wholesale, and distribution of manufactured products, supplies, and equipment, excluding bulk storage of materials that are inflammable or explosive or that present hazards or conditions commonly recognized as offensive.

Waste
As used in the Mineral Management Chapter of the General Plan, the barren rock excavated from a mine. The waste dump is the area where waste is disposed of or piled.

Watercourse
Natural or once natural flowing (perennially or intermittently) water including rivers, streams, and creeks. Includes natural waterways that have been channelized, but does not include manmade channels, ditches, and underground drainage and sewage systems.

Watershed
The total area above a given point on a watercourse that contributes water to its flow; the entire region drained by a waterway or watercourse which drains into a lake, or reservoir.

Waterway
(See “Watercourse.”)

Wetlands
Those areas that are inundated or saturated by surface or ground water at a frequency and duration to support, and that under normal circumstances do support, a prevalence of vegetation typically adapted for life in saturated soil conditions. Wetlands generally include swamps, marshes, bogs, and similar areas.

Williamson Act
Known formally as the California Land Conservation Act of 1965, it was designed as an incentive to retain prime agricultural land and open space in agricultural use, thereby slowing its conversion to urban and suburban development. The program entails a ten-year contract between the City or County and an owner of land whereby the land is taxed on the basis of its agricultural use rather than its market value. The land becomes subject to certain enforceable restrictions, and certain conditions need to be met prior to approval of an agreement.
Zone, Combining
A special purpose zone which is superimposed over the regular zoning map. Combining zones are used for a variety of purposes, such as airport compatibility, flood plain or wetlands protection, historic designation, or special parking regulations. Also called “overlay zone.”

Zone, Interim
A zoning designation that temporarily reduces or freezes allowable development in an area until a permanent classification can be fixed; generally assigned during General Plan preparation to provide a basis for permanent zoning.

Zone, Traffic
In a mathematical traffic model the area to be studied is divided into zones, with each zone treated as producing and attracting trips. The production of trips by a zone is based on the number of trips to or from work or shopping, or other trips produced per dwelling unit.

Zoning
The division of a city or county by legislative regulations into areas, or zones, that specify allowable uses for real property and size restrictions for buildings within these areas; a program that implements policies of the General Plan.

Zoning District
A designated section of the city or county for which prescribed land use requirements and building and development standards are uniform.

Zoning Map
Government Code §65851 permits a legislative body to divide a county, a city, or portions thereof, into zones of the number, shape, and area it deems best suited to carry out the purposes of the zoning ordinance. These zones are delineated on a map or maps, called the Zoning Map.
