

# Project 15

**Name:** Glacier Way Trailhead

**Description:** improvement and expansion of the Glacier Way Trailhead, including additional paved parking area and drainage improvements. Heavily used trailhead with parking spill-over into the adjacent Glacier Way public roadway during peak usage. Expansion and formalizing of parking area results in 23 parking spaces, including 1 accessible space adjacent to the existing paved accessible path. Trailhead provides access to many existing Tahoe Donner trails, the Donner Lake Rim Trail and proposed Projects 13, 14 and 16.

**Location:** county; access from Glacier Way, a dead end road located at one of the highest elevations along Skislope Way and the larger Tahoe Donner subdivision.

**Project Type(s):** improvement and expansion of existing

**Trail Type:** trailhead

**Topography & Grade:** parking area and adjacent terrain relatively flat, sloping downward to the north toward Glacier Way resulting in an approximate 10% existing / proposed access driveway approach from the parking area.

**Size / Area:** +/- 110' x 42' paved parking area with an 80' long, 24' wide access driveway. +/- 4700 square feet of paving (+/- 3500 square feet (e) to be overlaid)

**Constraints & Resources:** none identified

**Opportunities & Areas of Import:** expanded parking area will incorporate needed improvement to drainage conveyance and detention. Minimize tree removal and ensure protection of trees to-be-retained during construction.

**Construction:** heavy equipment use; staging within and adjacent to the project site within the Glacier Way right-of-way

**Typical Details & Specifications:** T.D. 1-3 (BMP's)
